TERM 1 CLASSES

Feb 3

Feb 10

Feb 17

Feb 24

Mar 3

Mar 10

Mar 17

Mar 24

Mar 31

Some topics in this course may feel familiar to those who have attended previous classes. However, since technology continues to evolve at a rapid pace, revisiting the basics ensures that everyone stays up to date and confident with the latest tools and features

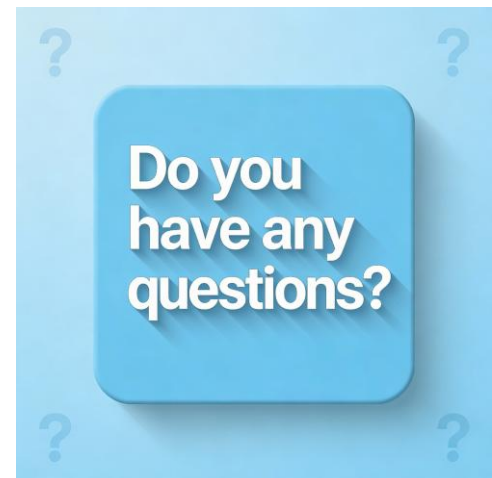

- For this course, if you can it is advisable to bring your laptop with you and charger. If you cannot, try sharing.

• **“Your questions are important — we’re here to answer them.”**

- Computers will play a role in the lives of older adults in generations to come, but the challenge now is to get the current cohort to use the technology in ways that can enhance their quality of life.

Tech News

Playlist Playground

Apple Music has a new Playlist Playground feature that lets users create a playlist with a text-based prompt.

New Emoji

iOS 26.4 adds eight new emoji characters, including trombone, treasure chest, distorted face, hairy creature (Sasquatch), fight cloud, orca, landslide, and ballet dancer.

Apple Music

Apple Music features a "Concerts Near You" feature that helps you find shows in your area and tour dates for artists that you're a fan of. Apple is partnering with companies like Ticketmaster to provide local concert info.

Offline Music Recognition

In Control Center, the song recognition feature is now able to identify songs without an internet connection, providing results when you're back online.

Apple Podcasts

With iOS 26.4, Apple added video podcast capabilities to the Apple Podcasts app. The feature uses HTTP Live Streaming (HLS) to provide podcast creators with "unprecedented control and monetization opportunities" while also providing a high-quality viewing experience.

Stolen Device Protection

Stolen Device Protection is now enabled by default for all iPhone users, rather than being an opt-in feature.

Messages App

There are new animations in the Messages app for actions like launching a new conversation

Ambient Music Widget

There is a new Ambient Music widget for the Home and Lock Screen. It supports playing different built-in ambient music options for sleep, productivity, wellbeing, and more.

Wallpaper and Watch Face Gallery

The Wallpaper Gallery has an updated design that allows Wallpapers from each category like Weather, Astronomy, Emoji, Colors and More to be downloaded to the iPhone.

Reminders

The Reminders app has a new "Urgent" section. Reminders that have Urgent toggled on during creation will show up here. Urgent ensures that reminders have an accompanying alarm so you get a clear warning when a reminder is due.

Health App

iOS 26.4 includes a new Average Bedtime metric for the sleep section of the Health app, providing a better idea of how bedtime can impact sleep quality.

Camera

In the Settings section of the Camera app, there is a new "Audio Zoom" option. The feature causes recorded audio to focus on the subject when the camera is zoomed while recording a video. It can be turned on or off, depending on the audio settings you prefer.

Hotspot Data

Apple moved the location of hotspot data usage. Rather than having data usage metrics tucked away under Cellular, you'll see how much data you've used right in the Personal Hotspot section.

Passcode Settings

In the Face ID and Passcode section of the Settings app, when you enter a passcode to access your options, the text is now center aligned instead of left aligned.

Keyboard Bug Fix

iOS 26.4 offers improved keyboard accuracy when typing quickly, addressing a bug in iOS that caused some characters to be missed when a user was typing rapidly. The missed characters could impact how autocorrect worked, causing the feature to be unable to predict what the user meant to type.

Security Updates

iOS 26.4 fixes more than 35 security vulnerabilities

impacting everything from Safari to Messages, and multiple underlying services.

There were no actively exploited vulnerabilities that Apple encountered, but it is still a good idea to update to iOS 26.4 to get the latest patches.

Now that Apple has publicized the vulnerabilities, they might be taken advantage of by bad actors.

SCAM ALERT

**Email
scams**

**Phone
scams**

**Text
scams**

- Bank impersonation scams right now
- ANZ has current alerts for an “Advisor Verification” phone and email scam, where callers pretend to be ANZ, then send a fake verification email and code to gain your trust and push you to share information.

- ANZ also reports a fake “new direct debit set up” email scam, urging you to call a mobile number if you didn’t authorise it; the number connects you to scammers, not the bank.
- NAB reports recent “investment scams” impersonating high-profile experts in ads and messages, plus fake NAB-branded SMS or emails about rewards points or account issues that push you to click a malicious link or call a fake “fraud” number.

Google's free apps and services, grouped by category.

Everyday Productivity

App	What it does	Free storage/limit
<u>Gmail</u>	Email	15 GB shared
<u>Google Drive</u>	Cloud file storage	15 GB shared with Gmail & Photos
<u>Google Docs</u>	Word processing	Unlimited docs
<u>Google Sheets</u>	Spreadsheets	Unlimited sheets
<u>Google Slides</u>	Presentations	Unlimited
<u>Google Forms</u>	Surveys & polls	Unlimited
<u>Google Calendar</u>	Scheduling	Unlimited
<u>Google Keep</u>	Notes & to-do lists	Unlimited
<u>Google Contacts</u>	Contact management	Unlimited

App	What it does
<u>Google Meet</u>	Video calls (up to 100 people, 60 min free)
<u>Google Chat</u>	Messaging & group chats
<u>Google Messages</u>	SMS/RCS on Android

- **Communication & Meetings**

App	What it does
<u>Google Photos</u>	Photo backup & editing (15 GB shared)
<u>Google Maps</u>	Navigation & local search
<u>Google Earth</u>	3D globe exploration
<u>YouTube</u>	Video watching & publishing
<u>Google Lens</u>	Visual search via camera

- **Photos, Maps & Media**

App	What it does
<u>Google Search</u>	Web search
<u>Google Translate</u>	100+ languages
<u>Google Scholar</u>	Academic research
<u>Google Classroom</u>	Teaching & course management

- **Search & Learning**

App	What it does
<u>Gemini</u>	AI assistant (free with Google account)
<u>NotebookLM</u>	AI research assistant — upload docs, get summaries & audio overviews
<u>Google AI Studio</u>	Build & test AI prompts (completely free)

- **AI Tools (Free Tier)**

App	What it does
<u>Google Chrome</u>	Web browser
<u>Google Authenticator</u>	2-factor authentication
<u>Google Family Link</u>	Parental controls
<u>Google Fonts</u>	Free font library
<u>Google Fit</u>	Basic health & step tracking

- **Device & Utility Apps**

- All of the above are free with a standard Google account. The only catch is the shared 15 GB storage limit across Gmail, Drive, and Photos — once that fills up, Google prompts you to upgrade.

Have a great Easter Break
